

# Investing in India's long-term growth potential

## Navigating in a reforming political environment

The Indian economy has shifted to a new path and is supported by very attractive demographics and political reforms. We believe India offers investors one of the most attractive and significant long-term growth potentials in the world.

However, investing in India is complex, and the Indian equity markets being one of the largest in terms of listed companies, selectivity is key in capturing these opportunities. We navigate the Indian markets by identifying and combining longer-term trends and mid to shorter-term themes that fit the dynamics and characteristics of the Indian equity markets extremely well.

## Selecting the best companies for you

An actively managed portfolio of high-conviction stocks with balanced emphasis on large, medium and small-cap stocks ensures that every single stock we select makes a difference to your investment returns, while at the same time offering sufficient risk diversification.

We have been active investors in India for more than 15 years, and our experience has taught us that it is important to look through short-term market sentiment and irrational behaviour of market participants, and to focus on company fundamentals and the longer-term investment outlook. Our differentiated long-term investment

approach based on the identification of trends and themes, has been time-tested in the Indian equity market over many years. By identifying structural trends, we can position the portfolio strategically, thus allowing for a longer-term perspective, while at the same time adopting a more proactive approach to shorter-term investment themes within the Indian equity markets.

## Our commitment to you

We are committed to continuously exploring trends and themes and identifying the growth potential and exciting investment opportunities in India. We are convinced that the key to success and achieving superior investment returns is an active and focused approach.

## We offer you

- Thematic-based investments from Indian insights
- High-conviction stock picking aligned with the themes
- Proven investment approach
- Lasting investments that make a difference

Our ambition is to be the leading investor in Asian equities, and we look forward to making a difference for your investments.

## GROWTH

The growth in India offers an attractive investment potential, and a growing number of companies in the region are getting increasingly relevant on a global scale.

## COMPOUNDING

Compounding is the art of accumulating growth through active investment in sustainable quality companies that grow over time.

## POTENTIAL

Our global insights and proven investment strategy set the foundation for long-term value creation.

# C WORLDWIDE INDIA COMPOSITE

GROSS OF FEES IN EUR AS OF 31 MARCH 2026

## INVESTMENT PHILOSOPHY

Name	C WorldWide India Composite
Launch date	31 May 2020
Benchmark	MSCI India Net Total Return Index
Read more	<a href="http://www.cworldwide.com">www.cworldwide.com</a>

The strategy aims to achieve long-term capital growth exceeding the return of the market with a moderate risk profile in line with the market risk. Taking into account India's particular market structure, the portfolio will consist of between 40–70 high conviction stocks, with a combination of large, as well as medium and small-cap stocks. This fact sheet has been prepared by C WorldWide Asset Management Fondsmæglersekskab A/S and is for information purposes only.
